

Understanding Platform, Basket, and Umbrella Clinical Trials

As clinical trials evolve, it is natural to feel overwhelmed with understanding master protocols for new study designs – namely platform, basket, and umbrella trials – but we can help.

Through years of experience helping sponsors manage complex oncology trials, endpoint has established a deep understanding of these new study designs and the emphasis needed on continuously advancing eClinical technology to accommodate for the increasing complexities of trial management.

Cat Hall, VP Product Strategy at endpoint, created an overview Infographic, informative Video presentation, and in-depth Webinar detailing how endpoint’s technology helps to more efficiently manage your platform, basket, & umbrella trials.
